Summary

Full Stack Developer with 3+ years in React.js, Next.js, Node.js, Python, Java. Builds scalable web apps, AI integrations, real-time systems (WebSockets, SSE), cloud services (AWS Lambda). Proficient in Redux, RTK Query, Elasticsearch, Redis, MySQL, PostgreSQL, MongoDB, RabbitMQ.

Skills

Languages: Python, Java, JavaScript, TypeScript, PHP, Node.js, HTML, CSS

Frameworks/Libraries: React.js, Next.js, Node.js, NestJS, Redux, RTK Query, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch

Message Brokers: RabbitMQ, Beanstalk

Others: AI, GraphQL, Blockchain SDK, Git, Linux, Cron, DSA, Design Patterns, AWS Lambda, AWS EC2, Docker, WebSockets, SSE, Web Workers

Experience

Payatu - Pune

June 2025 – Present

Full Stack Developer – Awarded with Rising Star Award

- Built a real-time notification system using **SSE** in **Next.js**, reducing user-reported notification delays by 90%.
- Migrated 50+ legacy API calls to **RTK Query**, eliminating duplicate requests and cutting page re-renders by 60%.
- Architected an **AI** chat interface in **Next.js** with **SSE** streaming, and wrote backend **AI plugins** in **Python** for database and workflow integration.
- Integrated **Redux** store for centralized state management across 20+ views, ensuring consistent data flow and predictable UI state transitions.
- Generated downloadable asset and SBOM reports via HTML-to-PDF pipeline in the backend, saving 3+ hours/week of manual reporting.
- Leveraged **Web Workers** for heavy computation tasks and built a decompiler UI to handle 100MB+ data seamlessly, including zero-day vulnerability handling.
- Established CVE and package dashboards with data visualizations, and global alert/toast notification systems controlled by backend config.
- Constructed backend chat APIs using **Python** for the **AI** feature, handling message processing, conversation history, and plugin orchestration.
- Delivered a file manager for firmware browsing, SBOM dashboard, firmware management UI, and 15+ frontend enhancements across the platform.
- Pioneered **AI agents** and **AI plugins** for chatbot systems and integrated **blockchain wallets** for bridge transactions.

Tolaram Cricket (Freelance)

Feb 2025 – May 2025

Full Stack Developer

- Launched a tournament betting system for cricket matches using **MySQL**, **React**, and **Node.js**, handling 1000+ concurrent users with match betting and bet placement.
- Introduced a comments feature for match-specific rooms, building backend infrastructure with **Node.js** to assign comments to 50+ tournament rooms.
- Engineered tournament round betting functionality, enabling bets on different stages such as semi-finals using **Node.js**.
- Architected “Super 12” feature (similar to Dream11) with 12-player team selection, captain/vice-captain picks, credit limits in **Node.js**, adopted by 250+ users.
- Built a leaderboard system using **Redis** sorted lists for real-time rankings, with periodic database backups via cron jobs for data persistence in **Node.js**.
- Scripted Python batch jobs to calculate user points based on betting outcomes and player performances, updating standings for 250+ users.

- Planned and shipped an admin panel for tournament management, team creation, match setup, player score updates, and analytics dashboard using **Node.js**.

Hubhopper - Delhi

April 2024 – Oct 2024

Podcast Hosting and Distribution Platform

Full Stack Developer

- Crafted an embedded player interface using **React**, and built analytics using **Elasticsearch** and **PHP** including listen-through rate, unique listener count, and performance metrics across 500+ podcasts.
- Expanded the chapter feature for podcast episodes with frontend UI (**React**) and backend APIs in **PHP** for content navigation.
- Streamlined download analytics delivery using queue mechanisms and **AWS Lambda**, delivering analytics as a ZIP file using **Python** to 200+ publishers.
- Utilized **Next.js** with **React** for a smooth podcast listening experience with real-time audio streaming, reducing load times by 35%.
- Engineered a podcast analytics system with intuitive UI analytics graphs for data visualization using **React** and **PHP**.
- Managed batch processing for 10,000+ daily listen impressions in **Elasticsearch**, using Cron and **PHP** for timely analytics updates.
- Executed batch deletion of 1000+ inactive podcasts via RSS feed integration from external platforms using **Python**.

Cognizant Technology Solutions - Chennai

May 2023 – Apr 2024

Software Engineer

- Deployed an RTO tracking system by integrating attendance and location data with **React** and **Next.js**, used by 500+ employees for dynamic rendering.
- Strengthened authentication and authorization with **React**, **JWT** tokens, and **Next.js** for SSR/CSR based on user roles.
- Integrated 5+ third-party APIs for employee data insights using **React** and **Next.js** with server-side fetching.
- Enforced role-based access controls across 4 departments, ensuring department-specific feature access with **React** and **Next.js**.

Cognizant Technology Solutions - Chennai

Sept 2022 – Mar 2023

CSD Intern

- Contributed to full-stack development of internal tools using **React**, **HTML**, and **CSS**, supporting 3 production modules.

Education

Sastra Deemed University, Thanjavur, B.Tech in Mechatronics

Aug 2018 – Aug 2022

Excellencia Junior College, Hyderabad, MPC

Aug 2016 – Aug 2018

Projects

- Auto Email Sender: Built an autonomous outreach system using **Python** that scrapes LinkedIn (hiring posts, recruiter profiles, company employees) via **Apify**, removes duplicate contacts, queues emails through **RabbitMQ**, and dispatches personalized emails with resume attachments — fully scheduled via cron jobs.
- Tic-Tac-Toe Multiplayer: Built a real-time multiplayer Tic-Tac-Toe game using **React** on the frontend and **Nakama** game server on the backend. Implemented live **WebSocket** connections for real-time matchmaking, move synchronization, and game state management with server-authoritative logic, leaderboard system, and private room support.

Achievements

Rising Star Award at Payatu for outstanding contributions to the team.
